Event-driven workflows for inter-agency data sharing

Registering and curating resources for Disaster Management...

New Tools For A Streamlined Workflow!

- New streamlined workflows integrate resource registration and curation within the GeoPlatform's Dynamic Digital Community experience
- Register Resource Plugin
 - Quickly register your resources (Datasets, Services, Layers, Maps, Applications and Websites) as assets of the Community portfolio!
- Item Details Page
 - Peruse and do things with your data and assets!
- Asset Carousel Plugin
 - Present just the assets you want through customizable filters and controls!
- Map Viewer Plugin
 - Display geospatial data in interactive Open Maps!
- Embedded Galleries
 - Organize and share your data and resources in curated Galleries!
